

RUAN GUILHERME KOVACS DE OLIVEIRA

SYSTEMS ANALYSIS AND DEVELOPMENT STUDENT | DEVELOPER IN TRAINING

BACKEND • FULL STACK • AI • DATA • AUTOMATION

Curvelo, MG, Brazil | Available for remote work | +55 (38) 99968-2082 | kovacsruan@gmail.com

PROFESSIONAL PROFILE

Systems Analysis and Development student at UNIASSELVI, transitioning into the technology field. Professional experience in Brazil and Portugal in leadership, team management, process organization, customer service, problem-solving, and operational improvement. Alongside my degree, I have been developing personal projects focused on software development, APIs, web applications, data, automation, and Artificial Intelligence. Seeking a remote internship or junior position to apply technical knowledge to real projects, learn from technology teams, and grow professionally.

TECHNICAL SKILLS

Development: Java, Spring Boot, TypeScript, Node.js, React, REST APIs

Data & Infrastructure: PostgreSQL, Redis, Docker, service integration

Quality: Testing, QA, API validation, and technical documentation

AI & Automation: AI applications, process automation, and system integration

Tools: Git, GitHub, and project organization

Professional Skills: Leadership, process organization, problem-solving, communication, and teamwork

SELECTED PROJECTS

KOVI AI — AI application with web/API architecture, service integration, and cloud deployment.

KOVIAN Fitness — Web system for managing clients, schedules, payments, assessments, and personal trainer operations.

KOVIAN Finance — Financial management application focused on data organization, operations, and future automation.

Portfolio — Public repository with documentation, case studies, architecture, skills, and projects:
